

AVMaster

Abandoned Vehicle Management Software

AVMaster is for use by Local Authorities who wish to **effectively** and **efficiently** deal with the increase in administration workload brought about by increasing numbers of abandoned vehicles seen over recent years.

AVMaster is a **purpose built computer system** designed to reduce your Administration while at the same time increasing case management efficiency

- ✓ **Jump Start your Department**
- ✓ **Standardize Procedures**
- ✓ **Reduce Administration Time**

AVMaster is *user friendly* - designed from the ground-up with the user in mind AVMaster follows standard windows behaviour reducing training requirements, where appropriate *Wizards and Shortcuts* have been included. As for the capabilities of AVMaster - don't be misled by it's ease of use - IT'S ALL THERE just see for yourself! Being fully compiled, AVMaster flies along at *light speed*!

Our main system screen allows you to **view cases by Status** (open, late, or closed) for all cases or for a specified Officer. Further options allow you to find records by Street, Vehicle Registration Number, User Reference, System Reference or Registered Keepers Name. Each listed case displays current vehicle status, whether the vehicle has been visited, if visited the vehicle condition and required action, whether action is required immediately and current locale/stage. Further information for the highlighted case is also displayed including vehicle information, informant information, Street Name, local landmark/junction details and more..... This single screen allows you to **visually monitor all cases on file including their current stage** (automatically calculated by the system).

Why do users choose AVMaster ?

- **Gain the knowledge, experience and methodology** of leading Local Authorities
- Give administrators the **tools, direction and structure** required to get the job done!
- **Keep track** of all cases and due dates
- Produce **management reports** at the touch of a button
- **Incorporate new standard letters** at any time
- **Remove the Stress** created by Administration Overload out of your Work Environment
- **Annual Lease or License at a very affordable price...**

Fully networked - no additional cost per user - no third party software required to run.

Free – Download and test drive a Fully Working 30 day version of AVMaster from our web site

Try it before you buy it!

Why are users so impressed with AVMaster ?

- Modern interface makes using the system a pleasure
- Automatic status and colour coding
- No Learning Curve, No Special Training Required
- Inbuilt wizard cross checks the database during case creation
- Users up and running quickly and efficiently
- Prints Standard Letters.
- In built forms, letters and contractor request sheets.
- Reduces time spent administrating cases

As a purpose built system, new and required features can be immediately added unlike "Jack of all trade systems" where features might be added in a year or two. **Keep ahead of the game instead of playing catch up!**
