

FlyCaptureIT

Local Government Software
at its Very Best

Calculate your Monthly Flycapture returns with ease

The Environment Agencies Flycapture system is designed to log your collated monthly return totals. **You need your own systems** (manual and/or computerised) to gather, collate your data and calculate accurate and auditable totals... FlycaptureIT is that system!

If you don't produce the final monthly return but you do provide figures used in it you still need systems in place to provide an audit trail of that data.

- ✓ **Jump Start your Department**
- ✓ **Standardize Procedures**
- ✓ **Reduce Administration Time**

Each Individual Fly tipping case can have multiple offenders each with multiple actions and outcomes. Actions and outcomes are included in the monthly return applicable to that action so a single case will have stats added on multiple returns... Each action has an outcome. Some outcomes like Prosecutions have multiple outcomes... Fined Amount, Costs Awarded and Prosecution costs...

To manually collate this information and maintain an audit trail is practically impossible!

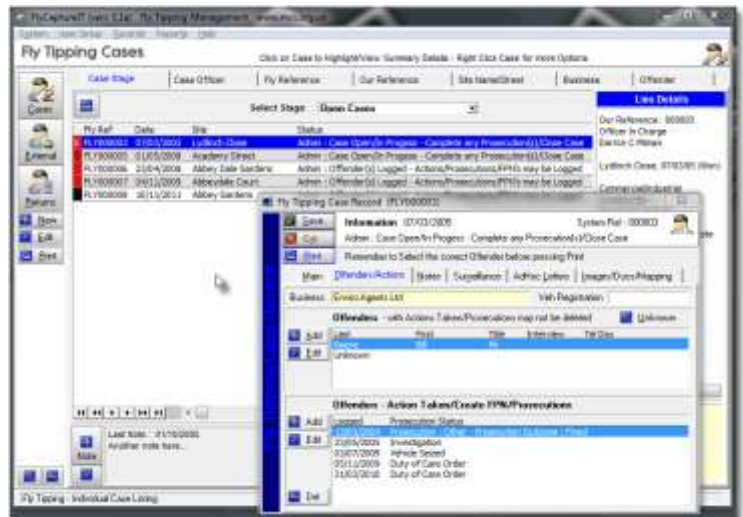

It is highly unlikely that any system not specifically designed to produce the Environment Agencies Returns will produce all data required - they will certainly not do any of it efficiently and it is very unlikely they will do it accurately" FlycaptureIT will and does!

FlyCaptureIT allows you to **visually monitor cases and their current stage**. All data required from each case is added to your return in **real-time!** Any number of Offenders may be logged against each case. Any number of actions may be logged against each offender. You can even automatically produce/issue a Fixed Penalty Notice if this course of action is taken. Special forms allow you to enter any returns produced by **other departments** for collation onto your authorities master return.

Why do users choose FlyCaptureIT ?

- **Gain the knowledge, experience and methodology** of leading Local Authorities
- Give administrators the **tools, direction and structure** required to get the job done!
- **Keep track** of all cases and due dates
- Produce **management reports** at the touch of a button
- **Incorporate new standard letters** at any time
- **Remove the Stress** created by Administration Overload out of your Work Environment
- **Annual Lease or License at a crazy low price!**

Fully networked - no additional cost per user - no third party software required to run.

Why are users so impressed with FlyCaptureIT ?

- Modern interface makes using the system a pleasure.
- No Learning Curve, No Special Training Required.
- Users up and running quickly and efficiently.
- Reduces time spent administrating cases.
- Produces a two way audit trail!
